

Attachment A

Scope of Work Nutrient Analysis in the Klamath River

--
12/12/17

Introduction

The purpose of the nutrient analyses is to use an established contract lab to analyze water samples for nutrients and other related constituents to understand nutrient dynamics in the Klamath River and tributaries.

Tasks

1. Prepare sample bottles including adding any preservatives necessary and deliver sample bottles at least one week before the sample event is to occur to:

Yurok Tribe Environmental Program
Attn: Cassandra Grimm
190 Klamath Blvd.
Klamath, CA 95548

2. Analyze water samples for the following analytes, unless otherwise noted on COC and communicated with lab personnel:

TOTAL-P
SRP
TOTAL-N
NITRATE + NITRITE
AMMONIA
CHLa/PHAEOa
DOC
TSS
VSS
ALKALINITY
TURBIDITY

3. Contracted lab is to provide results in Excel spreadsheet format to Cassandra Grimm within 30 days of receiving water samples from Yurok Tribe Environmental Program.
4. Analytical Method for each parameter is to be provided.

Deliverables

The primary deliverable for task 2 and 3 is to be an Excel spreadsheet containing data for the water samples that were submitted for the analyses stated in task 2. The delivered data would include the lab's current quantification limits for the analytes tested by the lab and the QA

methodology results and any other important information pertaining to the results of the water samples submitted to Aquatic Research Inc.

Timeline

The Yurok Tribe Environmental Program will begin nutrient sampling in March and will continue to submit samples on a variable basis year round, unless otherwise communicated with the lab.

Determination of Winning Bid

Determination of the winning bid will be the result of the scoring from the table below.

Evaluator’s Initials: _____ Date: _____

Yurok Tribe Nutrient Lab Analysis Report

Prospective Contractor: _____

<i>Items</i>	<i>Points Awarded</i>	<i>Points Possible</i>
Cost of Analysis Notes:		30
Familiarity with working with KBMP Notes:		25
Reporting Limit of Method Notes:		15
Approved Methods of Determination Notes:		15
Proximity to Klamath Notes:		15
Total Score		100 points

Bid Submission

Please submit bids to mhanington@yuroktribe.nsn.us or by mail to:
Yurok Tribe Environmental Program
Attn: Matthew Hanington
190 Klamath Blvd.
Klamath, CA 95548
