

**SECTION 311100 – SITE CLEARING**

Addendum B Revisions shown in red

**PART 1 GENERAL**

1.1 Description

- A. This section includes protection of facilities, clearing site of surface debris, grasses, trees, and other plant life in preparation for site excavation work and general development.
- B. This item shall be in reference to Section 02 41 00 – Demolition, for the specific requirements of tree protection, cultural fire clearing, topsoil stockpile, among others.
- C. Disposal of grubbing items such as organic materials, shrubs, trees, roots, logs, rocks, and other non-clean soil items, shall be disposed per owner requirements in a place suitable for such activities.

**PART 2 MEASUREMENT**

- A. Payment for this item shall be on a lump sum.

**PART 3 PRODUCTS (not used)**

**PART 4 EXECUTION**

4.1 Protection

- A. Locate, identify, and protect existing facilities scheduled to remain in place from damage during clearing and grubbing practices.
- B. Identify and protect trees, plant growth, and features designated to remain as final landscaping.
- C. Protect benchmarks from damage and displacement.

4.2 Clearing

- A. Clear only those areas required in order to accommodate proposed developments. Do not adversely impact adjacent property, frontage improvements, creek riparian setbacks, or other property features or improvements.
- B. Clearing limits and identification of trees to remain onsite shall be coordinated between the contractor and owner or owners representative prior to commencement of work.

4.3 Removal

- A. Remove grasses, brush, trees, and other debris as required and dispose of off-site in strict accordance with applicable laws and regulations. Site for disposal of vegetation debris shall be coordinated and approved by owner prior to off hauling. Burning of vegetation debris shall not be allowed.
