YUROK TRIBE ENVIRONMENTAL PROGRAM

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

FOR: Blake Allotment

LOCATED ON: Blake Road, Klamath, CA 95548

APN: 141-040-60

PREPARED FOR:
Yurok Tribe
190 Klamath Blvd
Klamath, CA 95548

DATE: October 2014

PREPARED BY:
Suzanne Fluharty, PhD
Environmental Specialist
Yurok Tribe Environmental Program
PO Box 1027
Klamath CA 95548

Signatures of Environmental Professionals

The following Environmental Professionals performed this Phase I ESA in conformance with ASTM Standard Practice E 1527-13 and AAI Standards. The following individual(s) meet the qualifications for individuals completing or overseeing all appropriate inquiries, and possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding the existence of environmental conditions on the property. Any work completed on this ESA by an individual who is not considered an environmental professional was completed under the supervision or responsible charge of the environmental professional.

EXECUTIVE SUMMARY

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of AASTM E1527-13 at the Subject Property, APN 141-040-60, accessed via three minor arteries of Highway 169; an artery of US Highway 101 North, near Klamath Glen, California. The three minor access roads include Blake Road itself, Blake Bar Road (a side artery breaking to the south of Blake Road and crossing the levee), and Starwein Road. This assessment has revealed the following conditions in connection with the Subject Property:

- Former use of the streamside portion of the Subject Property as an illegal dumping site that included periodic, frequent burning of debris including associated appliances
- Current use of the Subject Property as rural residential land.

In our opinion, the above stated historic burning, that may be relatively small in area would none-the-less be considered Recognized Environmental Conditions (RECs) due to the type of materials burned and the repeated use for dumping in close proximity to a local stream and residences. The following report will outline the procedures used during this Site Assessment, the physical findings, the historical findings, and present uses of the property.
1.0 INTRODUCTION

The Yurok Tribe Environmental Program (YTEP) has prepared this Phase I Environmental Site Assessment (Phase I ESA) on the Blake Allotment property, located on Blake Road, in Klamath Glen, near Klamath, California (hereafter referred to as the Site, or Subject Property); APN 141-040-60. Sited on Latitude (North): 41.5112000 by Longitude (West): 123.9856000. This Phase I ESA was prepared for the exclusive use of the Yurok Tribe located in Klamath, California and the United States Environmental Protection Agency (US EPA) Region 9 Brownfields Program.

This Phase I conforms to the principals of ASTM E 1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM, 2013).

This report is organized as recommended in ASTM E1527-013.

1.1 Purpose
The Purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) associated with the Subject Property. An REC is defined by ASTM as the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release or a material threat of release of any hazardous substances and petroleum products even under conditions in compliance with law.

This report will include listings of historic RECs if applicable. A historical REC is an environmental condition which, in the past would have been considered a REC, but which may or may not be considered a REC currently.

RECs do not include de minimis conditions that generally would not be subject to any enforcement action if brought to the attention of appropriate agency.

1.2 Detailed Scope of Work
This Phase I ESA conforms to the principals of work described in ASTM E1527-13.

1.3 Significant Assumptions
It is assumed that the groundwater flow direction on the vicinity of the Subject Property is towards the south towards the Klamath River, based on sloping topography on the vicinity of the Subject Property.

1.4 Limitations and Exceptions
“No environmental site assessment can wholly eliminate uncertainty regarding the potential for the recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the property” (ASTM, 2013). The information included in this report is based professional opinions from our field reconnaissance and visual observations of the Subject Property and our review and interpretation of available historic information as described in this report.
1.5 Special Terms and Conditions
   No special terms or conditions are related to this investigation.

1.6 User Reliance
   This report was prepared for the sole and exclusive use of the Yurok Tribe located in Klamath, California and the USEPA Region 9 Brownfields Program. The scope of work performed in this investigation may not be appropriate to satisfy needs of others. Any use of this document and findings as at the sole risk of said user.
2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Subject Property comprised of 64.17 acres, is located in Del Norte County, beyond Post Mile of Highway 169, in the vicinity of the town of Klamath Glen, California. The parcel is located at the end of Blake Road. The eastern boundary of the subject properties is bordered by the Klamath River. The entrance to the property is located at latitude 41.5112 (North), by longitude 123.9856 (West).

According to the Del Norte County Assessor, the subject property (APN 141-040-60) was conveyed to Tribal Ownership, held in trust by the United States, by an Act of Congress dated 05/19/1958. It resides within the exterior boundaries of the Yurok Reservation.

Legal Description of APN 141-040-60: All that certain piece or parcel of land containing 14.82 acres, more or less, being a portion of the Southeast Quarter of Section 18, Township 13 North, Range 2 East, Humboldt Meridian, situate and lying in the County of Del Norte, State of California.

Figure 1 shows Subject Property in relationship to the general area and known landmarks.

2.2 Site and Vicinity General Characteristics

The site’s principal access is from Blake Road, an artery off US Highway 169, east of US Highway 101, a major artery that traverses North and South through Del Norte County, through the state of California. To the north of Blake Road and cutting through the subject property is another artery of Highway 169, Starwein Road. Currently the subject property consists of relatively flat land with an elevation of 94 ft. above sea level; the topography in the area slopes slightly to the southwest, towards the Klamath River. The Subject Property is within a Federal Emergency Management Agency (FEMA) Flood Plain. The general vicinity to the west is light residential with forest property to the north and vacant river bar to the south. The Klamath River forms the eastern boundary.

Figure 2 is the most current topo map of the area.

2.3 Current Use of the Property

The northern section of the approximately 15 acre parcel is light residential; comprised of several Tribal Assignments where mostly single family residences have been built in generalized areas, 1) a grouping at the lower region, adjoining the river levy and 2) individual scattered homes on an upper, heavily forested and steeply sloped area. The southern and western areas of the parcel are excluded from development due to the flooding potential. The various roads through the property are primarily for access to the River and traditional fishing areas.

2.4 Description of Structures, Roads, Other Site Improvements

Multiple residences that appear to be standard stick construction on concrete foundations with various siding are on the property. Those closest to the dumping consist of 3 homes and a currently vacant concrete slab that are accessed by gravel roads. Power utilities are run to these homes via
Figure 1 Site Location Map of Subject Property, Blakes Allotment. (This contour map shows the relationship of the Subject Property, the Blake's Allotment to adjacent creeks, the Klamath River, the Pacific Ocean, and the Yurok Tribe's main offices in the town of Klamath, California.)
Figure 2 1982 USGS 7.5 Minute Series, Topographic of Klamath Glen Quadrangle, Del Norte County, CA.
poles and there appears both well and or pump houses and an associated black plastic storage tank
supplying domestic water. They are accessed via paved, 2 lane roads to within a ¼ mile of their
locations where the pavement gives way to secondary hard packed gravel roads.

2.5 Current Use of Adjoining Properties

There are four adjoining properties that border the subject property. The property to the north of
the Subject Property (APN 141-040-59) is jointly owned by Maggie Cook and Kaloa Blake and is
currently zoned for timber. The five adjoining properties to the west are private residential parcels
and are listed below from north to south:

- APN 141-190-21 and 141-190-25 owned by Edward Kellogg,
- APN 141-190-31 owned by George Wilson
- APN 141-140-25 owned by Charles Waterman, and
- APN 141-140-31 Del Norte County public land utilized for the river levee.

The property to the south of the Subject Property is owned by United States of America, as public
land zoned for seasonal recreation use only and is part of original Allotment H42. It is currently
vacant and undeveloped land. The Properties beyond the contiguous boundaries are timber land to
the north; a mix of residential and trailer parks to the west. The Klamath River borders the subject
property to the east and the adjoining properties to the southwest.

Figure 3 shows the Subject Property in relationship to the neighboring parcels and the Klamath
River.
Figure 3 Parcel Map of Subject Property, Blake’s Allotment, APN# 141-040-60
3.0 USER PROVIDED INFORMATION

3.1 Title Records
There are no property transactions with the Yurok Tribe currently in process with the Subject Property. Therefore a title report has not been ordered.

3.2 Environmental Liens or Activity Use Limitations
There are no Environmental Liens or Activity and Use Limitations on file for the Subject Properties.

3.3 Specialized Knowledge
No special terms or conditions are related to this investigation.

3.4 Commonly Known or Reasonably Ascertainable Information
It is commonly known that floods are recurring events in the Klamath area, often changing the course of the river and tributary creeks, adjacent properties, and surrounding vicinity. It is also commonly known that the flood event of December 1964 destroyed the entire town of Klamath, as well as adjacent residential area of McBeth Acres in the Klamath Glen, where the subject property is located. The river flood stage is considered as local flows over 37 feet. The top five historical floods are listed below; all probably impacted the subject property.

- December 1861 flood reached a stage of 60 feet, site and datum then in use recorded a discharge of 450,000 ft³/s.
- February 1881 reached an unknown height as the gage was destroyed, but a discharge of 360,000 ft³/s is recorded.
- February 1890 flood waters reached a stage of 63 feet, with a discharge 425,000 ft³/s.
- December 1955 reached a gage height of 49.7 feet, with a discharge of 425,000 ft³/s.
- December 1964 waters reached a height of 55.3 feet (18 feet over the flood stage), with a maximum discharge rate of 557,000 ft³/s.

3.5 Valuation Reduction for Environmental issues
The intention of this document is to evaluate the potential impacts of REC’s on Tribal Lands within the Yurok Indian Reservation and therefore not relevant to this report. Any reduction in value of the property is unknown.

3.6 Owner, Property Manager and Occupant Information
The owner of the Subject Property is listed as the United States of America. There is no Property Manager for the Subject Property.
3.7 Reason for Performing Phase I ESA

Yurok Tribe Environmental Program (YTEP), user of this report, indicated that the reason for performing a Phase 1 ESA is to ensure that contamination does not threaten public health and the environment during and after use or redevelopment of the Site. The Yurok Tribe has selected this Site to be evaluated under the US EPA Section 128(a) Tribal Response Program.
4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Yurok Tribe Environmental Program has contracted with Environmental Data Resources (EDR), a company that specializes in the acquisition and compilation of local, state, and federal environmental records, to acquire the ASTM required records. EDR searched the Subject Property and surrounding area for standard environmental records as required by ASTM E1527-13. A complete listing of the databases searched and the radius searched are included in the EDR Radius map report, which is provided in Appendix C.

The Subject Property is not listed on any available standard environmental records and databases reviewed by the EDR report. City directory data and Sanborn Fire insurance maps were not available with coverage for the Subject Property. Surrounding sites identified in the EDR report include the following:

- Yurok Indian Reservation does not have a listed address and is included in the “Indian Reservation” database, indicating the presence of Indian administered lands that have an area of greater than or equal to 640 acres.

- One US BROWNFIELDS site, McBeth Site 1 at 23 Alder Lane is within approximately 0.354 miles of the subject property. Yurok Tribe Environmental Program conducted a Phase I and Phase II Environmental Site Assessment due to the potential of hazardous waste residue from burning of petroleum products, solid waste, lead batteries and trash. These were completed by February 2010 and the site was considered not an ecological risk and reported clean.

Other sites listed in the EDR Radius Map report are unlikely to have a negative impact on the Subject Property due to distance from the Subject Property.

4.1.1 EDR Historic Aerial Photographs

Aerial photographs from 1964, 1976, 1988, 1993, 1998, 2005, 2009, 2010, and 2012 were provided by EDR and are included in Appendix D. The aerial photographs were reviewed and the following observations made:

- 1964: This photograph shows a network of roads, several areas of land cleared of trees and brush, and possibly multiple residences that are difficult to discern due to poor quality of photo.

- 1976: From this photograph, we see that the construction of the Klamath Glen levee has cut into the subject property. The adjoining property to the southwest has been
cleared of residences and or mobile homes. It can be assumed that the flood of 1965, destroyed them.

- 1988: Very poor quality and fuzziness makes detail impossible to see on this photo.

- 1993: This photo is of very poor quality makes detail impossible to see, however the shifting channel of the Klamath River and creation of a slough cutting the contiguous river bar region (seen in earlier photos) into an ‘island’.

- 1998: In this photograph, multiple residences are seen on the subject property, however it was taken from an altitude that makes viewing details impossible.

- 2005: From this photograph we are able to see several houses and multiple trailers on the subject property, possibly with a debris pile between Blake Road and Blake Bar Road. Most of the Subject Property has developed trees large enough to create canopy cover.

- 2009: This photo shows increased development between Blake Road and Starwein Road; some of which may fall within the subject property.

- 2010: Has little to no observable change from 2009 photograph.

- 2012: This photograph is taken from a high altitude and is slightly out of focus with no observable changes from the 2009 photo.

4.1.2 Other Historic Photographs

A search of the Humboldt State University Library’s Photograph collection revealed historic photos of the area of the subject property from circa 1915-1933 (Figure 4), and from 1964 (Figure 5).

- The photograph from circa 1915-1933 (Figure 4) shows the area of the subject property with no observable development. Notation on the photo documents that the area was called ‘Terwer Flats’ prior to becoming named Klamath Glen.

- The 1964 photograph (Figure 5) shows the subject property (seen at bottom center) at the height of the 64 flood. It was taken on Dec 29 and notation added that includes the comment, “All that is left of the residential section of the town is at right. Residences, summer homes, and an airfield were washed away...”
4.1.3 Historic Topographic Maps

Historic Topographic Maps from 1922, of the Subject Property and surrounding area were provided by EDR. Copies of the topographic maps are included in Appendix E. The topographic maps were reviewed and the following observations made:

- 1922 represents HWY 169 and possibly Blake Road as crossing the Klamath River and ending near a single residence, with 2 other’s north of the road, but within the subject property. This placement of the river appears to be an error.

- 1947 shows increased development in Klamath Glen and 3 houses on the subject property.

- 1952 shows increased development in Klamath Glen with a landing field and a single residence on the subject property.

- 1982 shows multiple residences (6-12) on the Subject Property and is labeled as the location of a Trailer Park, continued increase in development in Klamath Glen and Trailer Parks and a Boat Ramp on the river bar to the southwest of the subject property.

- 1997 shows perhaps 7 houses on HWY 169 extension and a Mobile Home Park on Blake Bar Road. The Klamath River has cut into the subject property and created slough and an island bar in the river.

4.1.4 Historic City Directories

Historic city directory has a single listing for the Subject Property in the years 1999, 2003, 2008, and 2013. Documentation is included in Appendix F. The listing is for 170 Blake Road, identified with occupants below.

- 1999 RON BATES
- 2003 OCCUPANT UNKNOWN
- 2008 RON BATES
- 2013 OCCUPANT UNKNOWN

4.1.5 Sanborn Fire Insurance Maps

Historic Sandborn Fire Insurance Maps were not available with coverage for the town of Klamath. Documentation of the lack of coverage is included in Appendix G.
4.2 Additional Environmental Record Sources
YTEP Illegal Dump Inventory and Environmental Toxin and Pollutant (ETAP) databases were searched and illegal dumping is reported at the end of HWY 169, within the subject Property external boundaries in 2010 and 2012.

4.3 Physical Setting Sources
The 1982 United States Geological Survey (USGS) 7.5 minute map titled Klamath Glen, California, which includes the Subject Property and surrounding areas, was reviewed and is included in Figure 3. The Subject Property has an elevation approximately 94 ft. above sea level with the general topography in the area sloping slightly to the southwest, towards the Klamath River which bounds the property to the south east.

4.4 Historical Use Information on Adjoining Properties
Based on historical information, the adjacent properties to the southwest have remained vacant and undeveloped since the time of the 1964 flood. After construction of the levee, Del Norte County zoning has listed use for all property on the riverside of the levee as restricted season camping only. Prior to the flood, there were residential with private homes, including mobile homes and RV camp grounds. The predominant use of the region is for commercial timber production. The lands in the general area are tradition Yurok territory and have been utilized by tribal members from time immemorial.

4.5 Data Failure
Historical records tracking the development for the Subject Property show the earliest development for the property on the 1922 Klamath Glen Topographic Quad. Property records for the County of Del Norte date back to 1958. The available historical data fails to identify the historical uses of the property prior to 1958. This creates a data gap between the years 1922 and 1958.
5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions
The Subject Property was inspected by Suzanne Fluharty, primary author of this report and staff of the Yurok Tribe Environmental Program on July 17, 2014. Photographs from the Site inspection are included in Appendix H.

5.2 Limiting Conditions
Extensive blackberry vines and general wild nature of the local shrubbery limited the author’s view of the lower level vegetation and soil around and arching over the local stream banks on the property.

5.3 General Site Settings
The northern third of the property is accessed by Starwein Road with several Tribal assignments with homes nestled in heavily timbered, sloped, land with higher elevation than the ‘lower’ regions accessed by Blake Road. There are no environment impacts reported associated with this northern area except for a few abandoned appliances at a Tribal Elder’s home.

To the north of Blake Road, three primary residences appear occupied, there is also an empty foundation, and nearly obscured by vegetation is a black plastic, above ground storage tank that may provide domestic water storage to these homes. Multiple utility poles provide service to the homes. Unfenced areas are used in common with playground equipment and scattered children’s bikes and toys in evidence. A few yards down the levee access road from the lower homes is an abandoned dump truck.

An area of primary historic and current illegal dumping and associated burning on the Subject Property exists along the banks of small, unnamed local stream, lying between the “Y” formed by Blake Road, Blake Bar Road, and other unnamed access roads. These access roads continue from Blake Bar Road, along the top of the levee as well as along its base ‘inside’ the protected zone of the levy and provide service access to the ends of the levy, and travel to upriver fish camps, and homes.

The illegal dump area was being cleaned by YTEP staff at the time of the filed inspection and the full depth of the trash was approximately 4-5 ft, running for close to 20 linear feet. Once surface rubbish was removed during staff cleanup, a layer of ash was visible and left in place.

5.4 Exterior Setting
The homes are small, wood frame houses with various siding, some of which appear to be older style, asbestos shingles.

5.5 Interior Observations
No interior inspections were made.
6.0 INTERVIEWS

6.1 Interviews with Owner
The property is owned by the United States and held in trust for the Yurok Tribe by the Bureau of Indian Affairs; no owners were interviewed. The property is ‘assigned’ to be utilized as primary residences for Tribal Members. Depending on the size of the parcel this might vary from one to many. The subject property is the Requa Voting District for the Yurok Tribe and Council Member Dave Gensaw, Sr. was interviewed on October 16, 2014. He stated that he was unaware of any contamination or environmental concerns at the Subject Property. A copy of the questionnaire is located in Appendix B.

6.2 Interview with Site Manager
In addition, to its role as owner (as described in 6.1), the Yurok Council manages the property through its staff. In this role, Emery Mattz, Environmental Specialist with YTEP’s Pollution Prevention Division was interviewed June 9, 2014 and stated that he was unaware of any environmental issues with the property beyond the illegal dumping at the ‘Y’.

6.3 Interviews with Occupants
There are no residents or occupants on the Subject Property at the time of the site inspection and no interviews were conducted.
7.0 FINDINGS

The assessment has identified the following environmental findings:

- There has been continuous historic and current illegal dumping of household trash and appliances on the Subject Property in close proximity to residential buildings, play ground, and seasonal stream that has been managed through open burning.

- The most recent trash removal has been by Yurok Tribe Environmental Program staff during 2014. They placed straw at stream edge to control erosion and posted the area with a NO Dumping sign.

- A layer of ash that may extend from the surface for up to several feet deep was left in place after surface debris was removed.

- There is an abandoned dump truck on the property.
8.0 OPINION

8.1 Recognized Environmental Concerns and Historic Recognized Environmental Concerns:

Based on information obtained from this investigation, it is my opinion that the following findings would likely rise to the level of regulatory enforcement and for this reason these conditions should rise to the level of Recognized Environmental Concerns (RECs).

- Household trash and products that included hazardous materials such as television sets and computers, as well as batteries were burned on a frequent basis at the junction of the secondary access roads and seasonal stream location on the Subject Property. The potential exists for hazardous releases to have occurred impacting the soil on the Subject Property and the potential exists for the transport of any such hazardous releases to have moved through the environment due to seasonal, heavy rainfall and transported via surface water of the stream into the adjacent Klamath River.

In addition, although there were no visually obvious releases emanating from the abandoned truck on the property, the potential exists for future releases of petroleum into the environment. However, due to the isolated nature of the abandoned vehicle any such releases would probably be considered *de minimis*.

8.2 Opinion Regarding Additional Appropriate Investigation:

The *obviousness* of the presence or likely presence of contamination from the burning of hazardous materials at the Subject Property, based on the REC’s and Historic Recs outlined in section 8.1, it is the opinion of this environmental professional that additional appropriate investigations be conducted to both soil and surface water media. Qualifications of the environmental professionals that prepared this report are included in Appendix H.
9.0 CONCLUSIONS

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-13 at the Subject Property, located on the Blake Allotment (APN141-040-60), In Klamath Glen, near Klamath, California. Any exceptions to, or deletions from, this practice are described in Section 2 of this report. This assessment has revealed the following recognized environmental conditions in connection with the property:

- Frequent dumping of household trash and appliances over many years with repeated burning of products that potentially contain hazardous materials have created the potential for hazardous releases to the air, soil, and surface waters.
10.0 DEVIATIONS

There were no significant deviations from ASTM E 1527-13.
11.0 ADDITIONAL SERVICES

No additional environmental services were provided under this contract.

The EDR Environmental LienSearch™ Report

EDR® Environmental Data Resources Inc
The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders’ offices, registries of deeds, county clerks’ offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

Source 2: Del Norte County, California Recorder

PROPERTY INFORMATION

Deed 1:
According to the Del Norte County Assessor, the current owner of the subject property is the United States of America. Records were searched at the Del Norte County Recorder’s Office. No conveyance was found of record for the subject property. See attached documents listing the subject property as being conveyed to Tribal Ownership, held in trust by the United States, by an Act of Congress dated 05/19/1958.

Legal Description: All that certain piece or parcel of land containing 14.82 acres, more or less, being a portion of the Southeast Quarter of Section 18, Township 13 North, Range 2 East, Humboldt Meridian, situate and lying in the County of Del Norte, State of California.

Legal Current Owner: United States of America

Property Identifiers: 141-040-60

Deed 2:
According to the Del Norte County Assessor, the current owner of the subject property is the United States of America. Records were searched at the Del Norte County Recorder’s Office. No conveyance was found of record for the subject property. See attached documents listing the subject property as being conveyed to Tribal Ownership, held in trust by the United States, by an Act of Congress dated 05/19/1958.

Legal Description: All that certain piece or parcel of land containing 49.35 acres, more or less, being a portion of the Northeast Quarter of Section 19, Township 13 North, Range 2 East, Humboldt Meridian, situate and lying in the County of Del Norte, State of California.

Legal Current Owner: United States of America

Property Identifiers: 141-040-61

Public Law 85-419

AN ACT

To amend section 831 of title 5 of the Canal Zone Code to make it a felony to injure or destroy works, property, or material of communication, power, lighting, control, or signal lines, stations, or systems, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 831 of title 5 of the Canal Zone Code is hereby amended to read as follows:

"§ 831. Communication, power, lighting, control, or signal lines, stations, or systems

Whoever (a) willfully or maliciously injures or destroys any of the works, property, or material of any radio, telegraph, telephone, cable, or television line, station, or system, or other means of communication, or of any power or lighting line, station, or system, or other means of power or lighting transmission or distribution, or of any control or signal line, station, or system, whether any such line, station, or system be constructed or in process of construction, or (b), willfully or maliciously interferes in any way with the working or use of any such line, station, or system, or (c), willfully or maliciously obstructs, hinders, or delays the transmission of any communication or signal, or the transmission or distribution of power or lighting by means of any such line, station, or system, is guilty of a felony."

Approved May 19, 1958.

Public Law 85-420

AN ACT

To provide for the restoration to tribal ownership of all vacant and undisposed-of ceded lands on certain Indian reservations, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all lands now or hereafter classified as vacant and undisposed-of ceded lands (including townsite lots) on the following named Indian reservations are hereby restored to tribal ownership, subject to valid existing rights:

<table>
<thead>
<tr>
<th>Reservation and State</th>
<th>Approximate Acreage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Klamath River, California</td>
<td>159.57</td>
</tr>
<tr>
<td>Coeur d'Alene, Idaho</td>

<tr>
<td>Crow, Montana</td>
<td>10,260.95</td>
</tr>
<tr>
<td>Fort Peck, Montana</td>
<td>41,350.13</td>
</tr>
<tr>
<td>Spokane, Washington</td>
<td>5,451.00</td>
</tr>
</tbody>
</table>

Provided, That such restoration shall not apply to any lands while they are within reclamation projects heretofore authorized.

Sec. 2. Title to the lands restored to tribal ownership by this Act shall be held by the United States in trust for the respective tribe or tribes, and such lands are hereby added to and made a part of the existing reservations for such tribe or tribes.

Sec. 3. The lands restored to tribal ownership by this Act may be sold or exchanged by the tribe, with the approval of the Secretary of the Interior.

Approved May 19, 1958.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists
US BROWNFIELDS: The EPA’s listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 06/24/2013 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

MCBETH SITE 1 (Continued)

Property Description: Former subdivision that was destroyed in the December 1964 Klamath River flood. Currently owned by the Yurok Tribe.
Latitude: 41.509400
Longitude: -123.992400
HCM label: GPS Carrier Phase Static Position
Map scale: Not reported
Point of reference: Entrance Point of a Facility or Station
Datum: North American Datum of 1927
ACRES property ID: 150301
Start date: 01-FEB-10
Completed date: 10-FEB-10
Acres cleaned up: .1
Cleanup funding: 20000
Cleanup funding source: US EPA - State & Tribal Section 128(a) Funding
Assessment funding: 23000
Assessment funding source: US EPA - State & Tribal Section 128(a) Funding
Redevelopment funding: Not reported
Redevelopment funding source: Not reported
Redevelopment entity name: Not reported
Redevelopment start date: Not reported
Assessment funding entity: EPA
Cleanup funding entity: EPA
Grant type: N/A
Accomplishment type: Phase II Environmental Assessment
Accomplishment count: 0
Cooperative agreement #: 00T12901
Ownership entity: Government
Current owner: Yurok Tribe

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

**Federal NPL site list**

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

**Proposed NPL:** Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

**NPL LIENS:** Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013

Date Made Active in Reports: 07/10/2013
Number of Days to Update: 62

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/29/2013
Date Made Active in Reports: 08/09/2013
Number of Days to Update: 72

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013
Date Data Arrived at EDR: 05/29/2013
Date Made Active in Reports: 08/09/2013
Number of Days to Update: 72

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.
Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- Date of Government Version: 06/17/2013
- Date Data Arrived at EDR: 06/21/2013

State- and tribal - equivalent CERCLIS
ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment.
Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/06/2013
Date Data Arrived at EDR: 09/11/2013
Date Made Active in Reports: 10/03/2013

Local Land Records

LIENS 2: CERCLA Lien Information
A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent
Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination.
CERCLIS provides information as to the identity of these sites and properties.
LIENS: Environmental Liens Listing
A listing of property locations with environmental liens for California where DTSC is a lien holder.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program’s oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder’s office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Records of Emergency Release Reports
HMIRS: Hazardous Materials Information Reporting System
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

CHMIRS: California Hazardous Material Incident Report System
California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

LDS: Land Disposal Sites Listing
The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units.
MCS: Military Cleanup Sites Listing

The State Water Resources Control Board and nine Regional Water Quality Control Boards partner with the Department of Defense (DoD) through the Defense and State Memorandum of Agreement (DSMOA) to oversee the investigation and remediation of water quality issues at military facilities.

Date of Government Version: 09/16/2013

Next Scheduled EDR Contact: 12/30/2013
Data Release Frequency: Quarterly

SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 11/10/2006
Date Made Active in Reports: 01/11/2007
Number of Days to Update: 62
Source: USGS
Telephone: 888-275-8747
Last EDR Contact: 10/18/2013
Next Scheduled EDR Contact: 01/27/2014
Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.
CONSENT: Superfund (CERCLA) Consent Decrees
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US MINES: Mines Master Index File
Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

TSCA: Toxic Substances Control Act
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.
GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007  Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007  Last EDR Contact: 12/17/2007
Number of Days to Update: 40  Next Scheduled EDR Contact: 03/17/2008
Data Release Frequency: No Update Planned

HIST FTTS INSPI: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Number of Days to Update: 40  Next Scheduled EDR Contact: 03/17/2008
Data Release Frequency: No Update Planned

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.
ICIS: Integrated Compliance Information System
The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

PADS: PCB Activity Database System
PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

MLTS: Material Licensing Tracking System
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

RADINFO: Radiation Information Database
The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

FINDS: Facility Index System/Facility Registry System
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).
RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data
on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This
information comes from source reports by various stationary sources of air pollution, such as electric power plants,
steel mills, factories, and universities, and provides information about the air pollutants they produce. Action,
air program, air program pollutant, and general level plant data. It is used to track emissions and compliance
data from industrial plants.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement
matters relating to facilities with alleged violations identified as either significant or high priority. Being
on the Watch List does not mean that the facility has actually violated the law only that an investigation by
EPA or a state or local environmental agency has led those organizations to allege that an unproven violation
has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged
violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and
local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

SAN DIEGO COUNTY:

Hazardous Materials Management Division Database
The database includes HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)
Date of Government Version: 09/23/2013
Date Data Arrived at EDR: 09/24/2013

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.
CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data
Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

- Target Property County: DEL NORTE, CA
- Flood Plain Panel at Target Property: YES - refer to the Overview Map and Detail Map
- Search Radius: 1.25 miles
- Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

- NWI Quad at Target Property: YES - refer to the Overview Map and Detail Map
- Data Coverage: NWI Electronic

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

- Site-Specific Hydrogeological Data*:
  - Search Radius: 1.25 miles
  - Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

<table>
<thead>
<tr>
<th>Soil Component Name:</th>
<th>BIGRIVER</th>

</tbody>
</table>

**OTHER SOIL TYPES IN AREA**

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

- **Soil Surface Textures:** silt loam, very gravelly - sand, loamy sand
- **Surficial Soil Types:** silt loam, very gravelly - sand, loamy sand
- **Shallow Soil Types:** No Other Soil Types
- **Deeper Soil Types:** No Other Soil Types

**LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
OTHER

Airport Landing Facilities:
Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters:
World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines:
The fault lines displayed on EDR’s Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

November 13, 2013
Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.’s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

170  RON BATES
Figure 4: Roberts Photograph 1999.24.0319, circa 1915-1933. Untitled, Humboldt State University Library. (Note: photograph probably taken on the north end of Starwein Ridge, three miles east of Klamath Glen, which shows subject property at lower left of center on the flat to the right of the river.)
Figure 5: Palmquist/Yale Photograph 2012.02.0356, 1964. Klamath Glen, Calif., River Cuts New Channel, Humboldt State University Library.
Summary: This shows the main access roads the Subject Property. The upper, left lane is Starwain Rd that gives access to the upper, or higher elevation homes; the lower, right lane is Blake Road leading to the lower homes, the river levy, and access to the Klamath River.

Figure 6 Main access roads to Subject Property (Blake Allotment).
Summary: These photographs show the secondary access roads within the Subject Property. Left: View is eastward; this shows “Y” at the end of Blake Road, to the right is Blake Bar Road that goes up and over the river levy and to the left is an unnamed artery that continues ‘inside’ the levy and provides access to the southern end of the levy, upriver fish camps, and homes. Upper Right: Looking east, access road on left running along the top of river levy and to the right fork, access down to the Klamath River. Note abandoned dump truck. Lower Right: Looking west, access road running along the top of river levy.

Figure 7 Secondary access roads within Subject Property (Blake Allotment).
Summary: This shows the ‘lower’ homes on the Subject Property. Visible are three primary Residences; and an empty foundation above the turquoise house and to right of center. Just to the right hand of the foundation, hidden in the vegetation is a black plastic, above ground storage tank that may provide domestic water storage to these homes. Note multiple utility Utility poles. Road in foreground is Blake Bar Road with the unnamed access road above.

Figure 8 Lower Homes on Blake Allotment.
Summary: This shows the area of the primary historic and current illegal dumping and associated burning on the Subject Property prior to clean up in 2014.

Left: Looking northward from bank of stream at illegal dump area in an attempt to document full depth of trash (approximately 4-5 ft).
Right: From the road showing the extent of dumping area (approximately 20 linear ft).

Figure 9 Primary Illegal Dumping Area on Blake Allotment Prior to YTEP Cleanup.
Summary: This shows site of the illegal dump and decades of burning on the Subject Property after clean-up.
Left: Illegal dump and burn area after clean-up and posting of ‘No Dumping’ sign.
Middle: Close up of the soil and ash layer left in place.
Right: Bank of seasonal, unnamed stream impacted by dumping and burning; visible just beyond the straw in photograph to left.

Figure 10 Site of Dump Area After YTEP Cleanup in 2014.
APPENDIX I  QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS
MICAH GIBSON

15900 HWY 101 N
Klamath, CA 95548

707-482-1822 ext 1002

YTEP Interim Director, Micah Gibson has been with the Tribe since 2003 and has primary responsibility for managing YTEP’s Water Division. Mr. Gibson administers the Yurok Tribe’s Water Quality Monitoring, Assessment, and Regulatory Programs in accordance with Tribal and grant funded program goals and objectives. In this role, he manages inter-agency and inter-Tribal water quality monitoring efforts and facilitates surface and ground water quality monitoring, assessment, and regulatory activities. He also works with numerous outside agencies on a variety of management and regulatory programs and policies to protect water resources with the Yurok Reservation and the Klamath Basin. Mr. Gibson is tasked with administration, management, and oversight of technical consultants and analytical laboratories. Mr. Gibson’s previous positions with the Tribe include Environmental Technician, Air Quality Specialist, and Hydrology Specialist. While in these positions, he administered 103 (CAA) grants and was primarily responsible for developing air quality monitoring and standards. Mr. Gibson serves on several panels and committees, including the Klamath Hydroelectric Settlement Agreement Interim Measure Implementation Committee (IMIC), Technical Advisory Committee (TAC) for IMIC and the Klamath Basin Tribal Water Quality Workgroup.

ORGANIZATIONS & COMMITTEES
- **National Tribal Toxics Council- US EPA Region 9 Representative**
  Advances toxics management policies and programs, consistent with the needs, interests, and unique legal status of American Indian Tribes, Alaska Natives, and Native Hawaiians

- **Regional Tribal Operations Committee Pesticide Workgroup- Member**
  Assists EPA in meeting trust responsibility, strengthening Tribal environmental and public health programs, and enhancing responsiveness by information exchange between Tribes and EPA

- **Watershed Stewards Project (WSP)- Advisory Board Member**
  Works to conserve, restore, and enhance anadromous watersheds for future generations by linking education with high quality scientific practices; CA Conservation Corps & AmeriCorps

- **Klamath Fish Health Assessment Team (KFHAT)- Fish Kill Response Team Member**
  Provides early warning and coordinated response to a non-hazardous materials fish kill event in the anadromous portion of the Klamath River basin.

- **Yurok Land Management GIS Workgroup -2010 Participant Member**
  Facilitates GIS capabilities within the Yurok Tribe, use of the comprehensive Yurok GISDatabase, and knowledge of the new and ever advancing Geospatial Technologies.
PROFESSIONAL EXPERIENCE

• **Environmental Specialist Yurok Tribe** 2009 - current
  *Co-Principal Investigator and Project Field manager of U.S. Environmental Protection Agency, National Center for Environmental Research Science to Achieve Results Grant # RD-83370801-0.
  *Oversees all aspects of collection, processing, and analysis of field samples up to transport to the appropriate laboratory in order to meet grant objectives.
  *Responsible for communication and coordination between Yurok Tribal council, research partners at Humbolt State University, California Tribal Epidemiology Center, California Department of Fish & Game, Fish and Wildlife Water Pollution Control Laboratory, staff, and the tribal community.
  *Assists with the environmental monitoring and research for resource management, population dynamics, pesticides, toxicology, and risk assessment.
  *Maintains and updates tribal GIS database on pesticide applications and monitoring within the Yurok Indian Reservation; preparing community notices and providing other educational materials as necessary.

• **Ethnobotanist Coquille Indian Tribe** 2002 - 2009
  *Completed botanical surveys and environmental inventories.
  *Formed management recommendations for maintenance, re-introduction, and restoration of important traditional plant species and habitats.
  *Mediated collaboration to achieve pragmatic goals incorporating both specific cultural and economic tribal needs within Bureau of Land Management mandates.
  *Participated in meetings across Tribal departments and with partnered federal agencies that included cultural, economic, and physical feasibilities for various forestry and natural resource plans.

• **Instructor**
  **Linn-Benton Community College**
  *Lecture and laboratory for General Biology 101; emphasis on development of scientific theories of evolution and classification of life on Earth; morphological adaptation of structures and functionality.

  Arts & Communication Division  9/2003 - 6/2004
