Yurok Tribe Environmental Program
PO Box 1027
Klamath CA 95548
707-482-1822
Signatures of Environmental Professionals

The following Environmental Professionals performed this Preliminary Phase I ESA that does not fully conformance with ASTM Standard Practice E 1527-13 and AAI Standards. It uses the ASTM standards as a framework and offers a summary of findings from a site visit, interview with the principal current owner and initial review of the Historic Environmental Records. It is intended for internal use within the Yurok Tribe only.

The following individual(s) meet the qualifications for individuals completing or overseeing all appropriate inquiries, and possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding the existence of environmental conditions on the property. Any work completed on this ESA by an individual who is not considered an environmental professional was completed under the supervision or responsible charge of the environmental professional.

EXECUTIVE SUMMARY

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-13 at the Subject Property, the Wautec Community (APN 533-074-024) located at the end of the road, State Route 169, near Weitchpec, California. This assessment has revealed the following conditions in connection with the Subject Property:

- Current use of the Subject Property as rural residential property.
- Secondary use of remote areas of the Subject Property as forest lands.
- Former illegal dumping and burning of household waste including possible hazardous materials and/or petroleum and petroleum products.
- Multiple abandoned trailers in various degrees of debilitation and potential structural collapse exist in various locations on the Subject Property.

In our opinion, the above stated conditions of illegal dumping and abandoned trailers may contribute to environmental degradation but although widespread, contaminant releases would be minor, *de minimis* conditions and would not be considered a Recognized Environmental Condition (REC).

The following report outlines the procedures used during this Site Assessment, the physical and the historical findings, and present uses of the property.
1.0 INTRODUCTION

The Yurok Tribe Environmental Program (YTEP) has prepared this Phase I Environmental Site Assessment (Phase I ESA) on the property where the Wautec Community is located, at the end of the road, State Route 169, near Weitchpec, California (hereafter referred to as the Site, or Subject Property). It is located on approximately 72.33 acres, near 123.8723730 West by 41.3502210 North, within the external boundaries of the Yurok Indian Reservation. This Phase I ESA was prepared for the exclusive use of the Yurok Tribe located in Klamath, California and the United States Environmental Protection Agency (US EPA) Region 9 Brownfields Program.

This Phase I conforms to the principals of ASTM E 1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (ASTM, 2013) and is organized as recommended in ASTM E1527-13.

1.1 Purpose

The Purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) associated with the Subject Property. RECs are defined by ASTM as the presence or likely presence of any hazardous substance or petroleum products on a property under conditions that indicate an existing release or a material threat of release of any hazardous substances and petroleum products even under conditions in compliance with law.

This report will include listings of historic RECs if applicable. Historical RECs are environmental conditions which, in the past would have been considered a REC, but which may or may not be considered RECs currently.

RECs do not include de minimis conditions that generally would not be subject to any enforcement action if brought to the attention of an appropriate agency.

1.2 Detailed Scope of Work

This Phase I ESA conforms to the principals of work described in ASTM E1527-13.

1.3 Significant Assumptions

It is assumed that the groundwater flow direction on the vicinity of the Subject Property follows the general south-southwest gradient, towards the Klamath River based on sloping topography in the vicinity of the Subject Property.

1.4 Limitations and Exceptions

"No environmental site assessment can wholly eliminate uncertainty regarding the potential for the recognized environmental conditions in connection with a property. Performance of
this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the property” (ASTM, 2013). The information included in this report is based on professional opinions from our field reconnaissance and visual observations of the Subject Property and our review and interpretation of available historic information as described in this report.

1.5 Special Terms and Conditions
It is commonly known that the community of Wauteck was called and mapped in the recent historic era (late 1800s to mid-1900), before the reorganization and US Congressional Recognition of the Yurok Tribe and the applicable Land Settlement Acts that defined the Yurok Reservation, as the community of Johnsons. This appears as a standard practice of that era to associate place names with the surname of the nearest Euro-American land owner. In this case, Johnson was a settler on the creek across the Klamath River to the west which became known as Johnsons Creek, and thereby the Yurok traditional village of Wauteck became labeled on official US Government maps as the community of Johnsons.

1.6 User Reliance
This report was prepared for the sole and exclusive use of the Yurok Tribe located in Klamath, California and the US EPA Region 9 Brownfields Program. The scope of work performed in this investigation may not be appropriate to satisfy needs of others. Any use of this document and findings as at the sole risk of said user.
2.0 SITE DESCRIPTION

2.1 Location and Legal Description
The Subject Property, the community of Wautec is located in Humboldt County, east of the Klamath River and at the end of State Route 169, near Weitchpec, California. The parcel number is 533-074-024 and it is owned by the United States of America in Trust for the Yurok Tribe. It lies within the external boundaries of the Yurok Indian Reservation. The Property’s legal description follows: All that certain piece or parcel of land being Lot 8 in a portion of Section 7, Township 11 North, Range 3 East, situate and lying in the County of Humboldt, State of California.

2.2 Site and Vicinity General Characteristics
Wautec sits on a low bench of land above the river gorge at approximately 158 feet above sea level within Humboldt County’s FEMA floodplain with an average depth to the water table of only one to three feet. It is surrounded by forested mountain ridges in all directions, the highest reaching 1287 feet in elevation to the North. Soils are predominantly gravelly with larger cobbled incursions within a clayey loam matrix.

2.3 Current Use of the Property
The Property is currently developed as a rural community of Assignments for Tribal Members’ residences along State Route 169 and the Klamath River including a public water system that draws water from Achelth Creek, a community hall, playground/basketball court, two churches and approximately 20 houses. The surrounding area is undeveloped forested land.

2.4 Description of Structures, Roads, Other Site Improvements
The Property has been utilized as a timber mill site for the staging and processing of logs and is crisscrossed with multiple logging roads in various condition from maintained hard pack to those that have been decommissioned and are utilized by the local community as trails. The main mill site can be reached by traveling up Camp Road to the first fork on the right at approximately longitude -123.845775 by latitude of 41.334803, then traveling approximately ¼ to ½ mile downslope to a three-way Y; then traveling along the upper right, lightly traveled but generally unmaintained road approximately ¼ mile to the site of the main yard of the historic mill site. Although overgrown, there are several concrete foundations, a low-lying area that appears to be a mill-pond site, and a large, standing conical burner at longitude 123.845885 West by latitude 41.336546 North.
Figure 1 Parcel Map and Surrounding Vicinity
2.5 Current Use of Adjoining Properties

The adjoining properties that border the Subject Property to the west are Tribal Trust lands utilized as forested, lightly developed residential areas assigned for Tribal Members residences. The property to the north, APN 534-091-009, of the Subject Property is owned and is the current residence of Tribal Member Lena Rose Sylvia except for the immediate area surrounding the residence, undeveloped forested land. The property to the east, APN 534-092-003 and the majority of property to the south, APN 534-096-015 are owned by the Yurok Tribe and are currently part of their Forest Reserve, Carbon Project. The property to the south-west corner of the Subject Property is owned by Beresford Hotel Corporation but was never developed and remains rural, forest land. The Properties beyond the contiguous boundaries are predominantly forested with scattered rural residential areas.
3.0 USER PROVIDED INFORMATION

3.1 Title Records
   There are no property transactions with the Yurok Tribe currently in process with the Subject Property. Therefore a title report has not been ordered.

3.2 Environmental Liens or Activity Use Limitations
   A search for Environmental Liens was ordered and there are no Environmental Liens or Activity and Use Limitations on file for the Subject Properties. Documentation for this is found in Appendix A.

3.3 Specialized Knowledge
   No specialized knowledge was acquired regarding the Subject Property.

3.4 Commonly Known or Reasonably Ascertainable Information
   It is commonly known that repeated, flood events occur in the Klamath River area including December 1964, which removed homes and the Pecwan Bridge along State Route 169 however the flood waters did not appear to reach or impact the homes within the Subject Property itself.

3.5 Valuation Reduction for Environmental issues
   The intent of this document is to evaluate the potential impacts of REC’s on Tribal Lands within the Yurok Indian Reservation. Any reduction in value of the property is unknown and therefore not relevant to this report.

3.6 Owner and Property Manager
   The Yurok Tribe is the owner and manager of Subject Property. It is primarily managed to provide residences for Tribal Members and the more remote regions, for forest production.

3.7 Reason for Performing Phase I ESA
   YTEP, user of this report, indicated that the reason for performing a Phase 1 ESA is to ensure that contamination does not threaten public health and the environment during and after redevelopment of the Subject Property. The Yurok Tribe has selected this property to be evaluated under the US EPA Section 128(a) Tribal Response Program.
4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources
YTEP has contracted with Environmental Data Resources (EDR), a company that specializes in the acquisition and compilation of local, state, and federal environmental records, to acquire the required records. EDR searched the Subject Property and surrounding area for standard environmental records as required by ASTM E1527-13. A complete listing of the databases searched and the radius searched are included in the EDR Radius Map Report provided in Appendix C. Three environmental cases of potential contaminant releases are listed within the vicinity of the Subject Property, one is of unknown nature, one was of diesel fuel that was cleaned-up, and the third was too distant to be of concern.

1) The California Regional Water Quality Control Board has listed a Spills, Leaks, Investigations and Cleanup Cases (SLIC) within a 5 mile radius of the Property but no information was available despite searches of the Regional Water Board web portal.

2) The California State Water Resources Control Board Leaking Underground Storage Tank Information System reports that there have been two cases of Leaking Underground Storage Tank (LUST) in the vicinity of the Community. One associated with the Jack Norton Elementary School, approximately 1/8 mile east of Wautece, involved the discharge of diesel fuel that was discovered by an unknown individual and the leak stopped on the same day as it was discovered on August 24, 1992. Two site assessments were performed. One at the time of the opening of the case in 1992 and a following one on February 19, 2003. The LUST was closed and clean-up completed with the issuance of a No Further Action Letter on October 19, 2003 by the Humboldt County Local Oversight Program (LOP). The action was assigned CASE #: 12413 by Bob Stone.

3) A LUST incident was located in Willow Creek, CA at the Trinity Valley Elementary School on Highway 96 and closed in 2004. The location of this leak is too distant to have had any significant impacted on Wautece.

4.2 Additional Environmental Record Sources
YTEP’s public records of illegal dumpsites and known environmental contaminants were searched and the only community concerns identified were to areas of household debris, 2 abandoned cars, and former residence that had burned in 2009-2010. No additional information pertaining to the Subject Property or adjoining parcels were found.
4.3 Physical Setting
The Subject Property is located along a flat area approximately 1,134 ft. above sea level with the Klamath River flowing at 190 feet elevation to the south, southwest of the Property. There is a decline in elevation to the north-northeast where a branch of the Pecwan Creek has cut the mountainous area that continues to rise beyond the creek to an elevation of 1,942 feet above sea level.

The topography in the area around the Subject Property generally slopes steeply to the west- southwest. It is predominantly forested with numerous small streams that flow into one of two primary creeks, either Pecwan to the north or Kulthkarn to the south.

4.4 Historical Use Information on the Property
Information in this section of the report is based on acquisition and review of various historical sources, including historic aerial photographs, historic topographic maps, and interviews with local officials. City directory data and Sanborn Fire insurance maps were not available with coverage for the Subject Property.

4.4.1 EDR Historic Aerial Photographs
The following photographs were located by EDR and included in their Aerial Photo Decade Package available in Appendix H.

- 1954- This photograph was taken from a high altitude and it is hard to discern details of structures. However, it shows the general forested nature of the area and documents the large extent of open prairie lands and the many logging roads in the vicinity. There is a cleared polygon slightly right of center of the photograph that roughly corresponds to the current location of Jack Norton School. There is no structure evident and may be presumed that the school is not yet built but process begun.

- 1974- This photograph is extremely out of focus, granular, and taken at an oblique that generated deep shadows that makes it of little use. The Klamath River and Johnsons Creek and river bar are all that is recognizable. It is of note that the extended river bar associated with Wautecl along the north riverbank in this section of the river is not visible, but the tributary associated with Johnsons Creek is fairly extensive.

- 1976- Details of the Wautecl Community are clearly visible in this picture which shows many structures, the roads through the community, Jack Norton Elementary School, and the many logging roads of the area. Of note, are the shifting river bars with an alternate build-up from the 1974 photograph.
• 1988- This photograph is out of focus and few to no details are visible.

• 1993- This photograph is out of focus and extremely blurry. Little can be distinguished except for the changing river channels and gravel bars.

• 1993- This photograph is slightly out of focus, however details of the community are visible with multiple structures and roads. It appears basically unchanged from the 1976 photograph except for numerous roads/trails from the community, off State Route 169 are visible leading onto the river bar.

• 2005- This is the first color photograph available of Wautec and is in sharp focus; Jack Norton School, houses, smaller outbuildings, and possible vehicles can be seen. The ‘larger’ white structure at the center of the photograph, sited slightly above the main grouping of Wautec’s homes is recognizable as the Wautec Community Center. Other development appears in the form of a playground, basketball court to the right of the community and off 169 toward the river. Also, clearly visible is increased development across the river with multiple cleared lawns/fields, homes, and the planting of some sort of row crop or orchard. Of note is overall increased growth of the forested areas and infill of the prairie areas and closed canopy around the homes.

• 2009- This is a good, crisp photograph of the Wautec area documenting little if any change from the 2005 photograph.

• 2010- In this photograph there are areas of forest clearing around several structures that were barely visible in the 2009 photograph. Roads are also more clearly visible, however the general area of Wautec and vicinity seems unchanged from earlier photographs.

• 2012- This photograph is out of focus but details are visible. Wautec appears unchanged from earlier photographs.

4.4.2 Other Historic Photographs
The California Department of Transportation and the Department of Forestry and Fire Protection has provided to the Tribe several sets of historic aerial photographs of the countryside of both Humboldt and Del Norte Counties that were taken to document both the conditions of the State roads systems and the forests. These were reviewed and one photograph form the 1965 collection was found showing the general area of the Subject Property. It was taken from a higher altitude than most of the EDR photographs discussed above and shows the relationship of Wautec to the surrounding area, but little individual details of the Community. Visible in the lower right
is Pecwan Creek and the bridge over it for 169 access. Also visible for the first time is the structure of Jack Norton Elementary School. These can be found in Appendix H.

4.4.3 Historic Topographic Maps
The following topographic maps are included in Appendix E.

- 1945- This map shows Highway 169 traveling along the east bank of the Klamath River and ending at a cluster of four structures and a cemetery marked Johnsons. There is a cluster of structures across the river and also to south-east along the highway at Pecwan. No other development is noted.

- 1952- There is an increase in development along the eastern side of the Klamath River in this map from the 1945 map. The structures have increased from four at the end of the road, Johnsons to twelve. This trend is also seen at Pecwan and the outlet of Knulthkarn Creeks. There are fewer structures across the Klamath River to the west and they are set further back from the river by this time.

- 1982-83- In this map there are more clearly defined roads in Johnsons and an unpaved road leading beyond the end of the road, Highway 169. There continues to be a slight increase in structures in Johnsons and Jack Norton School is clearly marked and labeled. The homes south of Knulthkarn Creek are now marked as the community of Surgone, currently known by the traditional name of Sregon. The general area remains unchanged from earlier maps and appears undeveloped.

- 1997- This map appears to be identical to the 82-83 map with the exception of a proposed corridor for Klamath Wild and Scenic River designation.

- 2012- In this map all symbols for structures have been removed and Highway 169 is now identified. The topography and surrounding are remains unchanged from earlier maps.

4.4.4 Historic City Directories
Historic city directory data was not available with coverage of Waute. Documentation of this is available in Appendix F.

The nearest connections are approximately 20 miles upriver, toward Weitchpec. This is probably the result of the community not receiving phone or electrical services until very recently, within the last few years of this report, 2016. Electrical poles and lines are still in the process of being installed.
4.4.5 Sanborn Fire Insurance Maps
Historic Sanborn Fire Insurance Maps were not available with coverage for the Subject Property. Documentation is included in Appendix G.

4.5 Historical Use Information on Adjoining Properties
The Subject Property and surrounding area has been since time immemorial the territory of the Yurok Tribe who continues to utilize its resources and to live on the adjoining properties, particularly to the west toward the Klamath River where multiple assignments have been granted to Tribal Members for their residences. During the historic era of 1860 to 2000, it was predominantly privately owned and managed as industrial forest lands to provide commercial timber products including the practices of clear cutting, replanting to Douglas Fir, and repeated seasonal spraying of herbicides.

4.6 Data Failure
The Humboldt County Recorder’s Office property records for the Subject Property date back to 1980 and have no conveyance of title transfer for the subject property, only that the United States of America acquired title to the property prior to 1980. Any historical use prior to 1980 and not associated with the USA title is unavailable for review. In addition, historical records tracking the development of the Subject Property date back to 1945 topographic map. The available historical data fails to identify the historical uses of the property prior to that time. This creates a data gap between the ASTM standard review year of 1940 and first record in 1945.
5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions
The Subject Property was inspected by Suzanne Fluharty and Richard Myers II of the Yurok Tribe Environmental Program on September 1, 2016. Photographs from the Site inspection are included in Appendix H.

Limiting Conditions—There were no limitations imposed by physical obstructions such as adjacent buildings, bodies of water, asphalt, or other paved areas, and other physical constraints (for example, snow, rain) EXCEPT FOR the heavy understory of brush, forbs, and vines.

5.2 General Site Settings
The Subject Property is located on a lightly sloping bench of land above the Klamath River in largely undeveloped forest except along the Klamath River front and both sides of Highway 169 that is a rural residential zone.

5.3 Exterior Setting
The tribal community of Wautec consists of approximately 18 to 21 homes of various ages and types. Some of the homes have nearby travel trailers that are difficult to discern if they are currently or permanently occupied or if they are being stored at the residences. There are a few historic structures with wood siding including two churches and several homes. In addition there are multiple mobile home trailers that the general consensus holds were brought into the area in the 1960’s or there about. To round out the community there are also several newer homes frame homes generally considered to be in a ‘Rambler’ style of architecture.

There is a public water system for the community which draws from Achelth Creek that borders the Property to the north. A treatment plant, pressure reduction tower, and associated water storage tank are on the Property. One home has a visible solar panel mounted on a pole but in general there are no electrical or telephone lines servicing the community.

There are several small construction debris piles, one with what appears to be discarded asbestos type shingles. Other possible contaminant sources include what may be individuals’ automobile ‘fix-it’ repair areas with various auto parts, oil pans, etc.

5.4 Interior Observations
No interiors were inspected as the buildings are generally private residences of Tribal Members and YTEP staff have no authority to enter.
6.0 INTERVIEWS

6.1 Interviews with Owner and Site Manager

The Subject Property is owned by the Yurok Tribe and the Yurok Tribal Council manages the property through its staff. The primary manager of the Tribal Assignments would be the Yurok Real Estate Office who oversees the property. The office was contacted and Samantha Myers was interviewed. A summary of the interview is included below in 6.3 Interviews with Local Government Officials.

6.2 Interviews with Occupants

One of the residences on the parcel is occupied by Julia Snyder who agreed and was interviewed on October 11, 2016. She is a Tribal Member whose family has lived in the Wautec area for generations. Ms. Snyder explained that the main use of the Subject Property and surrounding area has been for homes, their cemetery, cultural sites and forest. She stated that she had two concerns regarding potential environmental contamination. First was that in her opinion there was something ‘wrong’ with their drinking water as it didn’t taste ‘right’ and second that was a worry about pollution from a squatter’s camp along the river bar, below the community. Then this lead into a discussion of illegal dumping of household trash and the abandoned trailers in the area. In particular she thought the trailers were dangerous and as to the illegal dumping, she was unaware of what it was comprised of but thought it was just trash. She had no other concerns regarding the Subject Property. Notes from the interview were recorded on the YTEP community Concern Questionnaire and a copy is provided in Appendix B.

No other occupant interviews were held.

6.3 Interviews with Local Government Officials

Samantha Myers works under the Planning Department as a Reality Assistant in the office who manages the Subject Property for the Tribe under the auspices of the Tribal Council and the Bureau of Indian Affairs. One of her primary tasks is to assist Tribal Members with preparation and submission of land assignment applications. In addition, the office also maintains evaluations, assessments, studies, statements for Environmental Quality and Archeological Resource Services for National Environmental Policy Act (NEPA), National Historical Preservation Act (NHPA), Clear Air Act (CAA), Clean Water Act (CWA), Endangered Species Act (ESA), and the Resource Conservation and Recovery Act (RERA).

Ms. Myers was interviewed over the phone on October 20, 2016 and notes were recorded on the YTEP Environmental Questionnaire, available in Appendix B. She knew of no environmental documents or records for the Subject Property and explained that the Property had always been trust land for the Tribe but before the Tribe took over jurisdiction, all prior land-use permits were managed through the Bureau of Indian Affairs. The current
use of the Property is primarily as assignments for Tribal Members' residences. She knew of no other plans for the Property. In the performance of her duties she felt that she had extensive knowledge of the property as she not only managed the paperwork but was, “out and around on the hills to review all assignment applications”. She knew of no land use restrictions for the Property other than a few cultural sites that are unavailable for development.

Her environmental concerns were general in nature about abandoned trailers and vehicles around the community that appear to be leaking oil. She mentioned that there were currently two assignments with complaints against the occupants for hoarding and excessive trash accumulation. One was in the Wauteck community and another in Old Village of Weitchpec. She stated that despite a clean-up of the trash in Wauteck by YTEP’s Pollution Prevention Division, the Tribal Council had passed an Action Item that the responsible individual had to further clean-up their assignment site. Other than these items, she knew of no other contamination related to the Property.
7.0 FINDINGS

The assessment has identified the following environmental findings in connection with the Subject Property:

- Current use of the Subject Property as rural residential property.
- Secondary use of remote areas of the Subject Property as forest lands.
- Former illegal dumping and burning of household waste including possible hazardous materials and/or petroleum and petroleum products.
- Multiple abandoned trailers exist in various degrees of debilitation and potential structural collapse.
8.0 OPINION

8.1 Recognized Environmental Concerns and Historic Recognized Environmental Concerns:

Based on information obtained from this investigation, it is my opinion that the findings of our investigation listed in 7.0 would likely not rise to the level of regulatory enforcement and for this reason these conditions should not be considered Recognized Environmental Concerns (RECs):

Although there has been widespread illegal dumping and burning of household trash and debris, in multiple areas of the Subject Property, there are no current visual obvious releases or threat of release from these areas and any associated contaminants would be considered de minimis.

8.2 Opinion Regarding Additional Appropriate Investigation:

Based on the RECs outlined in section 8.1 and the absence of the presence or likely presence of contamination at the Subject Property, it is the opinion of this environmental professional that no addition appropriate investigations be conducted.

Qualifications of the environmental professionals that prepared this report are included in Appendix H.
9.0 CONCLUSIONS

We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM E 1527-13 at the Subject Property, the community of Wauteck, (APN), near Weitchpec, California. Any exceptions to, or deletions from this practice are described in Section 2 of this report.

This assessment has not revealed any recognized environmental conditions in connection with the property.
10.0 DEVIATIONS

There were no significant deviations from ASTM E 1527-13.

June 15, 2016. Environmental Lien Search. Inquiry Number: 4641002.7S.

APPENDIX A  EDR ENVIRONMENTAL LIEN SEARCH RESULTS
Wautec
State Route 169
Hoopa, CA 95546

Inquiry Number: 4641002.7S
June 15, 2016
The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders’ offices, registries of deeds, county clerks’ offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

TARGET PROPERTY INFORMATION

ADDRESS

WAUTEC
STATE ROUTE 169
HOOPA, CA 95546

RESEARCH SOURCE

Source 1: Humboldt Assessor
Humboldt County, California

Source 2: Humboldt Recorder
Humboldt County, California

PROPERTY INFORMATION

Deed 1:

According to the Humboldt County Assessor, the current owner of the subject property is the United States of America. Records were searched at the Humboldt County Recorder’s Office back to 1980. No conveyance was found of record for the subject property. Based on our research, it appears that the United States of America acquired title to the property prior to 1980.

Legal Description: All that certain piece or parcel of land being Lot 8 in a portion of Section 7, Township 11 North, Range 3 East, situate and lying in the County of Humboldt, State of California.

Legal Current Owner: United States of America

Property Identifiers: 533-074-24

APPENDIX B ENVIRONMENTAL QUESTIONNAIRES
Yurok Tribe Environmental Program: Environmental Questionnaire

Respondent: Samantha Myers
Title: Realty Assistant II
Organization: Y

Status:
- [ ] Owner
- [x] Site manager
- [ ] Occupant
- [x] Government Official/STAFF
- [ ] Other: explain

What is the current use of the property?
- [ ] Assignments for Tribal Members' Residences

Do you know the past use of this property?
- [x] Yes
- [ ] No

If yes, describe:
Always been trust but prior to the Tribe taking control. Prior land-use permits through BIA for individual's homes.

Are there any transactions planned or underway for this property? If yes, what type?
- [x] Sale
- [ ] Purchase
- [ ] Exchange
- [ ] Other: explain

Who is the site contact for the property?
Sam

How can the site contact be reached?
My office

Who is the owner of the property?
Yurok

Who are the occupants of the property?
TRIBAL MEMBERS
Do you have any specialized knowledge or experience related to the property or nearby properties?

☐ Yes  ☐ No

If yes, describe: I'm out and around in the hills and review all assignment applications.

Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry?

☐ Yes  ☐ No

If yes, describe: Other than a few cultural sites that are unavailable for assignments.

Do you know of specific chemicals that are present or once were present at the property?

☐ Yes  ☐ No

If yes, describe: 

Do you know of any spills of other chemical releases that have taken place at the property?

☐ Yes  ☐ No

If yes, describe: 

Do you know of any environmental clean ups that have taken place at the property?

☑ Yes  ☐ No

If yes, describe: 

*Trailer (abandoned)

Based on your knowledge and experience related to the property, are there any indicators that point to the likely presence of contamination at the property?

☐ Yes  ☐ No

If yes, describe: 

* Weitchpole (Bowen's) gate? or K-Rails - approved by Council

Old Village complaints of hoarding.
### BROWNFIELDS- ESA PHASE I FIELD INSPECTION CHECK LIST

**Date of Survey:** 9/1/14  
**Inspected By:** [Name]  
**Property:** [Property]  

**INSTRUCTIONS:** Check each category. Briefly describe condition if 'On site' or 'Nearby' Applicable is checked. Describe the distance if nearby is checked.

YTP COMMUNITY CONCERN QUESTIONNAIRE

WHO YOU ARE: You are not required to give us your name, but it would enable us to follow up with you

Name: Julia Snyder
Address: Waneke

How long have you lived in the area? FOREVER

X I am Yurok  _ I am not Yurok

LOCATION: (Please write property name)

I know the location  X I know the vicinity

X I know where contamination IS (Please describe where):

Just last week the Community saw a squatter’s camp below 169 at the upper side of River Bar - but rains

WHAT IMPACTS: Please identify, if you can, the primary part of the environment effected by contaminants

Air  _ Land/soil  Animals we eat  Plants we use

X Drinking Water  _ Surface Water/Creeks/River  _ Springs

Please describe:

WHY OR HOW YOU KNOW: What is the source of your information?

X I heard about it  X I saw it  X I think it’s there  _ Other (describe below)

Additional information about how you know or who you learned the information from:

IMPACT OF CONTAMINATION: Have you made changes in your use of this property or the resources on or near it as a result of your concern?

_ Yes  _ No  How:

LEVEL OF CONCERN: Please indicate your level of concern by placing an X on the line below:

__________________________
Not Much  Moderate  A Lot

WHAT IS NEXT DOOR: Please describe use of neighboring properties:

Others’ homes, cemetery, forest, and cultural sites.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.
STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 03/14/2016 has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

**Count: 0 records.**

**NO SITES FOUND**
To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

**NPL:** National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

| Date of Government Version: 03/07/2016 | Source: EPA |
| Date Data Arrived at EDR: 04/05/2016 | Telephone: N/A |
| Date Made Active in Reports: 04/15/2016 | Last EDR Contact: 04/05/2016 |
| Number of Days to Update: 10 | Next Scheduled EDR Contact: 04/18/2016 |

- EPA Region 10
  
  Telephone 206-553-8665

**Proposed NPL:** Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| Date of Government Version: 03/07/2016 | Source: EPA |
| Date Data Arrived at EDR: 04/05/2016 | Telephone: N/A |
| Date Made Active in Reports: 04/15/2016 | Last EDR Contact: 04/05/2016 |
| Number of Days to Update: 10 | Next Scheduled EDR Contact: 04/18/2016 |

**NPL LIENS:** Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

| Date of Government Version: 10/15/1991 | Source: EPA |
| Date Data Arrived at EDR: 02/02/1994 | Telephone: 202-564-4267 |
| Date Made Active in Reports: 03/30/1994 | Last EDR Contact: 08/15/2011 |

**Data Release Frequency:**

- Quarterly
Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

- Date of Government Version: 03/07/2016
- Source: EPA
- Telephone: N/A
- Last EDR Contact: 04/05/2016
- Next Scheduled EDR Contact: 04/18/2016
- Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing
A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

- Date of Government Version: 11/13/2015
- Source: Environmental Protection Agency
- Telephone: 703-603-8704
- Last EDR Contact: 04/08/2016
- Next Scheduled EDR Contact: 07/18/2016
- Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System
SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

- Date of Government Version: 03/07/2016
- Source: EPA
- Telephone: 800-424-9346
- Last EDR Contact: 04/05/2016
- Next Scheduled EDR Contact: 08/01/2016
- Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive
SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under
the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP,
renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while
it is archived if site conditions change and/or new information becomes available. Archived sites have been removed
and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge,
assessment at a site has been completed and that EPA has determined no further steps will be taken to list the
site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or
other considerations require a recommendation for listing at a later time. The decision does not necessarily mean
that there is no hazard associated with a given site; it only means that, based upon available information, the
location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 04/05/2016
Date Made Active in Reports: 04/15/2016
Number of Days to Update: 10

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/09/2015
Date Data Arrived at EDR: 03/02/2016
Date Made Active in Reports: 04/05/2016
Number of Days to Update: 34

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that
move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the
waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015
Date Data Arrived at EDR: 03/02/2016
Date Made Active in Reports: 04/05/2016
Number of Days to Update: 34

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate
over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015
Date Data Arrived at EDR: 03/02/2016
Date Made Active in Reports: 04/05/2016
Number of Days to Update: 34
RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2015
Date Data Arrived at EDR: 03/02/2016
Date Made Active in Reports: 04/05/2016

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015
Date Data Arrived at EDR: 03/02/2016
Date Made Active in Reports: 04/05/2016

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

- **Next Scheduled EDR Contact:** 09/19/2016
- **Data Release Frequency:** Varies

**ADDITIONAL ENVIRONMENTAL RECORDS**

**Local Brownfield lists**

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

**Other Ascertainable Records**

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.
FUDS: Formerly Used Defense Sites
The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

DOD: Department of Defense Sites
This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

FEDLAND: Federal and Indian Lands

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing
The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

US FIN ASSUR: Financial Assurance Information
All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.
EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 01/23/2015
Date Data Arrived at EDR: 02/06/2015
Date Made Active in Reports: 03/09/2015
Number of Days to Update: 31
Next Scheduled EDR Contact: 07/25/2016
Data Release Frequency: Quarterly

Source: Environmental Protection Agency
Telephone: 202-564-5088

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009
Date Data Arrived at EDR: 04/16/2009
Date Made Active in Reports: 05/11/2009
Number of Days to Update: 25
Next Scheduled EDR Contact: 09/05/2016
Data Release Frequency: Quarterly

Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-566-1667

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009
Date Data Arrived at EDR: 04/16/2009
Date Made Active in Reports: 05/11/2009
Number of Days to Update: 25
Next Scheduled EDR Contact: 09/05/2016
Data Release Frequency: Quarterly

Source: EPA
Telephone: 202-566-1667

MLTS: Material Licensing Tracking System
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/07/2016
Date Data Arrived at EDR: 03/18/2016
Date Made Active in Reports: 04/15/2016
Number of Days to Update: 28
Next Scheduled EDR Contact: 08/22/2016
Data Release Frequency: Quarterly

Source: Nuclear Regulatory Commission
Telephone: 301-415-7169

COAL ASH DOE: Steam-Electric Plant Operation Data
A listing of power plants that store ash in surface ponds.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 08/07/2009
Date Made Active in Reports: 10/22/2009
Number of Days to Update: 76
Next Scheduled EDR Contact: 07/25/2016

Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007  Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007  Last EDR Contact: 12/17/2007
Number of Days to Update: 40  Next Scheduled EDR Contact: 03/17/2008
Data Release Frequency: No Update Planned

HIST FTTS INSPI: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

DOT OPS: Incident and Accident Data
Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 07/31/2012  Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/07/2012  Telephone: 202-366-4595
Date Made Active in Reports: 09/18/2012  Last EDR Contact: 05/04/2016
Number of Days to Update: 42  Next Scheduled EDR Contact: 08/15/2016
Data Release Frequency: Varies

CONSENT: Superfund (CERCLA) Consent Decrees
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.
BRS: Biennial Reporting System
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

INDIAN RESERV: Indian Reservations
This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

LEAD SMELTER 1: Lead Smelter Sites
A listing of former lead smelter site locations.

LEAD SMELTER 2: Lead Smelter Sites
A list of several hundred sites in the U.S. where secondary lead smelting was done from 1931 and 1964. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust.
US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/20/2015
Date Data Arrived at EDR: 10/27/2015
Date Made Active in Reports: 01/04/2016
Number of Days to Update: 69
Source: EPA
Telephone: 202-564-2496
Last EDR Contact: 03/24/2016
Next Scheduled EDR Contact: 07/11/2016
Data Release Frequency: Annually

US AIRS MINOR: Air Facility System Data

A listing of minor source facilities.

Date of Government Version: 10/20/2015
Date Data Arrived at EDR: 10/27/2015
Date Made Active in Reports: 01/04/2016

Next Scheduled EDR Contact: 09/12/2016
Data Release Frequency: Varies
FINDS: Facility Index System/Facility Registry System
Facility Index System. FINDS contains both facility information and ‘pointers’ to other sources that contain more
detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric
Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial
enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal
Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities
Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

**WASTEWATER PITS: Oil Wastewater Pits Listing**

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board’s review found that more than one-third of the region’s active disposal pits are operating without permission.

**ECHO: Enforcement & Compliance History Information**

ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.
EDR HIGH RISK HISTORICAL RECORDS

**EDR Exclusive Records**

**EDR MGP:** EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

**EDR Hist Auto:** EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**EDR Hist Cleaner:** EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.
EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LF: Recovered Government Archive Solid Waste Facilities List
The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Resources Recycling and Recovery in California.

SAN BERNARDINO COUNTY:

Hazardous Material Permits
This listing includes underground storage tanks, medical waste handlers/generators, hazardous materials handlers, hazardous waste generators, and waste oil generators/handlers.
SAN DIEGO COUNTY:

Hazardous Materials Management Division Database
The database includes: HE58 - This report contains the business name, site address, business phone number, establishment 'H' permit number, type of permit, and the business status. HE17 - In addition to providing the same information provided in the HE58 listing, HE17 provides inspection dates, violations received by the establishment, hazardous waste generated, the quantity, method of storage, treatment/disposal of waste and the hauler, and information on underground storage tanks. Unauthorized Release List - Includes a summary of environmental contamination cases in San Diego County (underground tank cases, non-tank cases, groundwater contamination, and soil contamination are included.)

San Diego County Solid Waste Facilities.

Environmental Case Listing
The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

SAN FRANCISCO COUNTY:

Local Oversight Facilities
A listing of leaking underground storage tank sites located in San Francisco county.

Underground Storage Tank Information
Underground storage tank sites located in San Francisco county.

SAN JOAQUIN COUNTY:
San Joaquin Co. UST
A listing of underground storage tank locations in San Joaquin county.
Date of Government Version: 04/06/2016
Date Data Arrived at EDR: 04/08/2016

OTHER DATABASE(S)
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.
Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/03/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5’ Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE
- Target Property County: HUMBOLDT, CA
- Flood Plain Panel at Target Property: 0600000200B - FEMA Q3 Flood data
- Additional Panels in search area: 0600000175B - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY
- NWI Quad at Target Property: YES - refer to the Overview Map and Detail Map
- TECTAH CREEK: YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:
- Search Radius: 1.25 miles
- Status: Not found

AQUIFLOW®
- Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID LOCATION GENERAL DIRECTION
Not Reported FROM TP GROUNDWATER FLOW

* ©1996 Site-specific hydrogeologic data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY
The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: ATWELL
Soil Surface Texture: clay loam
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.
Hydric Status: Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel: HIGH
Depth to Bedrock Min: > 60 inches
Depth to Bedrock Max: > 60 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

**UNMAPPED PROPERTY**

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

**Limited Permission To Make Copies**

Yurok Tribe (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

APPENDIX H EDR PROPERTY TAX MAP REPORT
EDR Property Tax Map Report

Environmental Data Resources, Inc.’s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

Summary: The Subject Property: the Yurok Community of Wautec as seen from the Klamath River the traditional access from the river; looking north-east. The river bar area is utilized during the summer and fall fish runs for extended camping and is often a source of household debris and other contamination left at the end of the fishing season. The structure on the river bar is for drying fishing nets.

Figure 3 Access to Subject Property via the Klamath River
Summary: These photographs show the primary roads in Wautec.

APPENDIX J

ADDITIONAL ENVIRONMENTAL RECORD
Site Name: Wautec Basket Rock

Community: Wautec

Tribe: Yurok

Site Status: [ ] Active (Open dump that is in use); [ ] Inactive (Open dump that is no longer in use)

Latitude: N 41° 34' 56.74" (Decimal degrees format)

Longitude: W 123° 8' 11.18" (Decimal degrees format)

Land Status: [ ] Private; [ ] Trust (Individual); [ ] Trust (Tribal); [ ] Allotted; [ ] Fee

Date Site was Surveyed: (MM/DD/YY): 10/29/15

When Applicable - Date Site [ ] Cleaned-Up, or [ ] Closed; (check one) (MM/DD/YY) 03/31/16

Note: Site cleaned-up indicates waste was removed and site is no longer used as a dump.
Site closed indicates waste was left in place, properly covered and site is no longer used as a dump.

Condition of Open Dump Site (check one):

[ ] Buried Waste; [ ] Surface Waste; [ ] Surface and Buried Waste

Site Characteristics

1. Surface Area (Acres) [ ] 1 # of Acres (1ac = 90% football field)

2. Surface Volume (Cubic Yards) (1yd = pickup bed) [ ] 63 # of Yd³

Hazard Factors (check all that apply)

1. Contents
   [ ] Abandoned automobiles
   [ ] Abandoned trailers
   [ ] Animal carcasses
   [ ] Appliances/white goods
   [ ] Construction and demolition waste
   [ ] Drums/containers of unknowns/pesticide containers
   [ ] Electronics
   [ ] Fluorescent light bulbs
   [ ] Furniture
   [ ] Lead acid batteries
   [ ] Medical wastes
   [ ] Mesh-lab wastes
   [ ] Municipal solid waste
   [ ] Scrap tires
   [ ] Sewage sludge/septic tank pumpings
   [ ] Suspected asbestos or lead containing materials
   [ ] Suspected RCRA Subtitle C hazardous wastes (treated wood, paints, solvents)
   [ ] Waste oil/oily wastes
   [ ] Yard/green wastes

2. Average Rainfall (See online resource if unknown)
   [ ] Low (<10 in/yr)
   [ ] Medium (10-25 in/yr)
   [ ] High (>25 in/yr)

3. Site Drainage and Leachate Potential (Leachate is water escaping from a dumpsite which, if not collected, can contaminate natural water sources.)
   [ ] Site drainage protects ground or surface water
   [ ] Limited perching, drainage effects are largely neutral
   [ ] Site drainage increases ground or surface water contamination

4. Flooding Potential
   [ ] No potential for flooding
   [ ] Debris movement from flooding unlikely
   [ ] Debris movement from flooding likely

5. Frequency of Burning
   [ ] Burning does not occur
   [ ] Burning less frequently than weekly
   [ ] Burning more frequently than weekly

6. Fenced site
   [ ] Yes
   [ ] No

7. Controlled Access
   [ ] Effectively controlled access
   [ ] Ineffective controls or poorly restricted access
   [ ] Unrestricted access

8. Public Concern
   [ ] No concern voiced
   [ ] Little concern voiced by the public
   [ ] Concern frequently voiced by the public

Revised for Open Dump Use Only: December 05, 2012
**OPEN DUMP SURVEY FORM**
Refer to OMDS field guide for definitions of terms

**Proximity Factors**

1. **Vertical Distance to Drinking Water Aquifer (check one)**
   - Greater than 600 feet
   - 51-500 feet
   - Less than 50 feet

2. **Horizontal Distance to Surface Water Bodies (check one)**
   - Greater than 1,000 feet
   - 51-1,000 feet
   - Less than 50 feet

3. **Distance to Homes (check one)**
   - Greater than 5,000 feet
   - 1,000-5,000 feet
   - Less than 1,000 feet

**General Description (include description of how to get to the site from a known location)**

Old house that had been tore down and burned. Old appliances and box springs present, bricks, boards, misc. construction debris and house hold garbage. 200 ft northwest of Jack Norton school rd

**Comments**

**Access Point** (Decimal degrees format): Longitude: W _________

Latitude: N _________

**Debris Location** (Decimal degrees format): Longitude: W 123 52’ 06.539

Latitude: N 41 21’ 39.102

GPS unit used: GARMIN _________, TRIMBLE X _________, OTHER _________

Is data point saved in GPS unit? Yes _________, No _________

Datum used: NAD 83 WGS84

When Applicable - Date Site Cleaned-Up.

**Condition of Open Dump Site** (check one)

- Buried Waste
- Surface Waste
- Surface and Buried Waste

**SITE CHARACTERISTICS**

1. **Surface Area in Acres** (1 acre = 90% football field)
   (not including area with windblown trash)

20 x 20 ft

2. **Surface Volume in Cubic Yards** (1 yd³ = pickup bed)

20 yds

**HAZARD FACTORS**

(check all that apply)

1. **Contents**
   - Abandoned automobiles
   - Abandoned trailers
   - Animal carcasses
   - Appliances/white goods
   - Construction and demolition waste
   - Drums/containers of unknowns/pesticide containers
   - Electronics
   - Fluorescent light bulbs
   - Furniture
   - Lead batteries
   - Medical wastes
   - Meth-lab waste
   - Municipal solid waste
   - Scrap tires
   - Sewage sludge/septic-tank pumpings
   - Suspected asbestos or lead containing materials
   - Suspected RCRA Subtitle C hazardous waste
   - Waste (treated wood, paints, solvents)
   - Waste oil/oily wastes
   - Yard/green wastes

2. **Average Rainfall**
   - Low (<10 in/yr)
   - Medium (10-25 in/yr)
   - High (>25 in/yr)

3. **Site Drainage and Leachate Potential**
   - Site drainage protects ground or surface water
   - Limited ponding, drainage effects are largely neutral
   - Site drainage increases ground or surface water contamination

4. **Flood Potential**
   - No potential for flooding
   - Debris movement from flooding unlikely
   - Debris movement from flooding likely

5. **Frequency of Burning**
   - Burning does not occur
   - Burning less frequently than weekly
   - Burning more frequently than weekly

6. **Fenced Site**
   - Yes
   - No

7. **Controlled Access**
   - Effectively controlled access
   - Ineffective controls or poorly restricted access
   - Unrestricted access

8. **Public Concern**
   - No concern voiced
   - Little concern voiced by the public
   - Concern frequently voiced by the public

**MUST COMPLETE BOTH SIDES**
PROXIMITY FACTORS

1. Vertical Distance to Drinking Water Aquifer (check one)
   - Greater than 600 feet
   - 31-599 feet
   - Less than 50 feet
   - Debris Upslope, or Debris Downslope of Intake

2. Horizontal Distance to Surface Water (check one)
   - Greater than 1,000 feet - approx. ¾ mile
   - 51-1,000 feet
   - Less than 50 feet
   - Debris Upslope, or Debris Downslope of Water

3. Distance to Homes (check one)
   - Greater than 1 mile - 5,280 feet
   - About ¾ mile - 2,140
   - Approx ¼ mile 1,000-2,139 feet
   - Less than 1,000 feet
   - Debris Upslope, or Debris Downslope of Homes

GENERAL DESCRIPTION (include how to get to the site from a known location)
PICTURES TAKEN: yes __ no ___

large pile of household waste at the top of the wauteka water intake road, mainly household trash, a riding lawn mower, tires and some construction waste.

COMMENTS
access road is in poor shape may need to get trash out before the rains come

Surveyor (First Name, Last Name, Organization)

DATE (mm/dd/yyyy)

08 / 11 / 2016

MUST COMPLETE BOTH SIDES

Date Recorded in Inventory Database

SUZANNE M FLUHARTY
2235 Jay Street    fluhartysm@gmail.com
Arcata, CA 95521    541.760.0480

EDUCATION
• Doctorate of Philosophy in Environmental Sciences  2008
  Oregon State University, College of Science
  Majors: Applied Anthropology; Botany and Plant Pathology
• Masters of Arts in Interdisciplinary Studies  2003
  Oregon State University, Graduate College
  Majors: Applied Anthropology; Botany and Plant Pathology; Speech Communication
• Bachelors of Arts, cum laude in Liberal Studies  2000
  Oregon State University, Liberal Arts College
  Minor in Speech Communication

JOB RELATED TRAINING
• USET Very Small Water Systems Course  2015
  United South and Eastern Tribes, INC.; 12.0 CH
• Incident Command System 100, 200, 300, 400, 700, 800  2014
  Federal Emergency Management Institute
• Natural Resource Damage Assessment  2014
  Northwest Environmental Training Center
  Northern California Safety Consortium
• Linking Nutrient Pollution & HABs: State of the Science & EPA Actions  2013
  U.S. EPA Watershed Academy
• Phase I & Phase II Environmental Site Assessments  2013
  ASTM International Technical & Professional Training; 2.1 CEU
  Inter Tribal Council of Arizona, Inc and USEPA Region Nine
• ESRI ArcGIS Certified- 121 Training Hours  2010 - 2011
• Wetland Permitting  March 2000
  Portland State University School of Extended Studies/ Continuing Ed.
• Issues Framing and Moderator Training Workshops  August 1999
  Portland Community College and Oregon State University Extension Service

ORGANIZATIONS & COMMITTEES
• National Tribal Toxics Council- US EPA Region 9 Representative
  Advances toxics management policies and programs, consistent with the needs, interests, and unique legal status of American Indian Tribes, Alaska Natives, and Native Hawaiians
• Regional Tribal Operations Committee Pesticide Workgroup- Member
  Assists EPA in meeting trust responsibility, strengthening Tribal environmental and public health programs, and enhancing responsiveness by information exchange between Tribes and EPA
• Watershed Stewards Project (WSP)- Advisory Board Member
  Works to conserve, restore, and enhance anadromous watersheds for future generations by linking education with high quality scientific practices; CA Conservation Corps & AmeriCorps
• Klamath Fish Health Assessment Team (KFHAT)- Fish Kill Response Team Member
  Provides early warning and coordinated response to a non-hazardous materials fish kill event in the anadromous portion of the Klamath River basin.
• Yurok Land Management GIS Workgroup -2010 Participant Member
  Facilitates GIS capabilities within the Yurok Tribe, use of the comprehensive Yurok GISDatabase, and knowledge of the new and ever advancing Geospatial Technologies.
PROFESSIONAL EXPERIENCE

• **Environmental Specialist Yurok Tribe** 2009 - current

  *Principal Investigator of U.S. Environmental Protection Agency, National Center for Environmental Research Science to Achieve Results Grant, Climate Change Impacts to Yurok Resources: Identifying, Assessing and Adapting to Changes in Water and Aquatic Resources, Food Security and Tribal Health Impacts, # RD-83560401-0; 2015-20118.

  *Co-Principal Investigator and Project Field manager of U.S. Environmental Protection Agency, National Center for Environmental Research Science to Achieve Results Grant, Understanding the Cumulative Affects of Environmental and Psycho-social Stressors that Threaten the Pohlik-lah and Ner-er-ner Lifeway: The Yurok Tribe’s Approach # RD-83370801-0; 2009-2014

  *Oversees all aspects of collection, processing, and analysis of field samples up to transport to the appropriate laboratory in order to meet grant objectives.

  *Assists with the environmental monitoring and research for resource management, population dynamics, pesticides, toxicology, and risk assessment.

  *Maintains and updates tribal GIS database on pesticide applications and monitoring within the Yurok Indian Reservation and preparing community notices.

• **Ethnobotanist Coquille Indian Tribe** 2002 - 2009

  *Completed botanical surveys and environmental inventories with management recommendations for maintenance, re-introduction, and restoration of important traditional plant species and habitats.

  *Mediated collaboration to achieve pragmatic goals incorporating both specific cultural and economic tribal need within Bureau of Land Management mandates.

• **Instructor**
  **Linn-Benton Community College**
  **Science and Technology Division** 9/2007 - 6/2009

  *Lecture and laboratory for General Biology 101; emphasis on development of scientific theories of evolution and classification of life on Earth; morphological adaptation of structures and functionality.

• **Oregon State University**
  **Mark Hatfield Marine Science Center** Summer 2006

  *Co-taught seminar course in Native American Estuarine Resources

  *Consulted with Confederated Tribes of Siletz to develop course materials and appropriate interpretation of historic material culture.

  **Anthropology Department /Extended Campus** 9/2005 - 6/2006

  *Designed and taught on-line course Natural Resources and Community Values; environmental communication and interactions between stakeholder/government agency management of public lands

SELECT PAPERS/ PRESENTATIONS

• **Cumulative Assessments and Tribal Subsistence** 2010

• **Practical Applications for Botanical Education in Native American Traditional Ecological Knowledge** 2008

• **One Tribe and Its Environment: What can an investigation of culture add to resource planning?** 2007

• **Environmental History of Euphoria Ridge; A Case Study of Ethnobotany in Traditional Resource Management** 2007

  PhD Dissertation. Environmental Sciences Program. Oregon State University. Documents 3 different cultures' traditional resource use across time at one site in Oregon's Southern Coast.

• **Euphoria Ridge: camas and root digging, cultural plants, and historic landscape** 2006

  Presentation and workshop. Coquille Indian Tribe 10th Annual Cultural Preservation Conference: Cultural Preservation on the South Coast; Ten years in Review. Mill Casino, North Bend OR.
PO BOX 551 • Hoopa, CA  95546 • 530.784.7581 • louisadebrose@gmail.com@gmail.com

SUMMARY

Committed to and has vested interest in the protection and enhancement of the environment of the Yurok Indian Reservation.

Entire, 16 year, work career involved in natural resource protection in the Klamath-Trinity River basin.

Appropriate education and work experience combination for the Environmental Director position.

Experience in every aspect of tribal environmental program operations:

- Grant Writing, Administration, Reporting
- Environmental Assessment Writing
- Collecting & Interpreting Environmental Data
- Budget & Workplan Development
- Supervising Environmental Staff
- Environmental Public Outreach
- Interacting With Tribal, Federal & State Government Officials

COMPUTER SKILLS

Fifteen (+) years of experience working on computers including the utilization of the following programs/software:

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Adobe Acrobat
- Adobe Photoshop
- Adobe Illustrator
- Adobe Dreamweaver

EXPERIENCE & WORK HISTORY

Summers 1998-2001  
Fisheries Technician, Yurok Tribe

Trapped and counted outmigrant salmonids at the rotary screw trap (when it was located in Weitchpec, CA), counted seals at the estuary in Klamath, CA.
Summers
Fisheries Technician, Hoopa Tribe
2002-2003
Trapped and counted outmigrantsalmonids in fyke nets on Hoopa Reservation streams and tagged fish at the Lewiston Dam in Lewiston, CA.

Summers
Environmental Intern, Hoopa Tribe
2003-2005
Environmental field work, water quality data collection and download, illegal dump inventory, first grant successfully funded.

2006-2014
Environmental Planner II, Hoopa Tribe
Successfully submitted grant applications, developed workplans, budgets, administered and completed workplan tasks and submitted reports (quarterly and final) for the following projects/programs:
- Methyl-Mercury in Macro-invertebrates, Bureau of Reclamation, 2006
- Illegal Dump Cleanup, California Integrated Waste Management Board, 2006
- Tribal Response Program, USEPA, CERCLA §128(a) 2010-2014
- Nonpoint Source Pollution, USEPA, CWA §319, 2013
- Hoopa Environmental Compliance Program, Tribal Compact Funds, 2012-2014
Completed Environmental Assessments for several different projects through many different funding agencies including the following:
- Campbell Field Expansion Project, Phase I (6 Homes)& Phase II (10 Homes), HUD
- New Hoopa Housing Authority Office Building, NAHASDA
- Housing Improvement Project, Rehabilitations/New Acquisitions (17 Homes), HUD
- Disaster Relief Initiative, Special Projects Rehabilitation (3 Tribal Buildings), FEMA
- Section 184 Indian Home Loan Guarantee Program, Bank Environmental Review Requirement (7 Homes), USDA
- Campbell Creek Treatment Plant Upgrade, USDA
- Telescope Water Tank Replacement, USDA

Eight years of experience navigating tribal government for the completion of travel requests, purchase requests, invoice payment, program budget approval/development, grant submittals, contracts etc.

Eight years of experience working with, federal state and other regulatory agencies.

January 2015 - Present
Environmental Director, Yurok Tribe

EDUCATION

1998
High School Diploma, Hoopa Valley High School

2006
Bachelor of Science, Environmental Science, First Nations Environmental Protection, Humboldt State University, Minors in Native American Studies & Art Studio
Applicable Coursework:
- Botany
- Microbiology
- Environmental Science & Engineering
- Calculus (for Biology, Science & Natural Resource Majors)
- Forest Ecology
• Soil Science
• Technology & the Environment
• Wildland Hydrology & Watershed Management
• Limnology
• Native American Perspectives in Natural Resources
• Organic Chemistry
• Environmental Justice
• Federal Indian Law
• Applied Geographic Information Systems (GIS)
